WHAT'S IN THE BOX?

- 01 Mist Nozzle
- 02 Outer Cover
- 03 Light Button
- 04 Mist Button
- 05 Power ON/OFF Button
- 06 USB Power Cable

- 07 Maximum Water Level
- 08 Splash-Proof Cover
- 09 Ceramic Disc
- 10 Air Outlet
- 11 Power Socket
- 12 Air Inlet

USING YOUR AROMA DIFFUSER + NIGHTLIGHT

Always use it on a base such as a plate or a tray. Place the Diffuser on a flat, non-porous surface which is safely out of reach of pets, babies and children and away from other electrical devices. For better mist circulation, place it at least 60cm off the ground on a firm, flat surface away from a wall. Do not place directly on a wood surface such as a dresser or nightstand because you may get spills or extra water on the surface which may damage the wooden surface.

Remove the top outer cover and fill the base with cold water up to or just below the maximum water level. The Diffuser holds a maximum of 150ml of water. The max water level is indicated by the indentation about halfway up the side wall of the base of the unit and as shown in the diagram (see page 8).

If using with essential oils, add them before turning the diffuser on. Never fill the diffuser with hot or mineral water. Plug the cable into the diffuser and then into a USB 5V power adaptor. Plug the power adaptor directly into the wall socket. Ensure any cables or cords are well out of reach of the cot, bassinet or bed.

USING WITH ESSENTIAL OILS

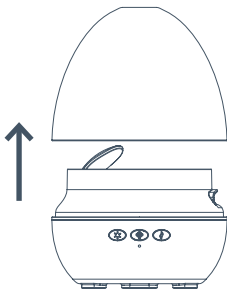

Your Diffuser can be used with or without essential oils. Whenever essential oils are used care should be taken to ensure that you are using the correct dosage and type of oil. This is especially important if you are pregnant or are using around newborns, babies, children and animals. For general guidance on essential oil usage refer to our guides on our website which are also linked through the QR code below and the manufacturer's information.

For general guidance
on essential oil usage

STEP 1

Disconnect from power and open the top cover.

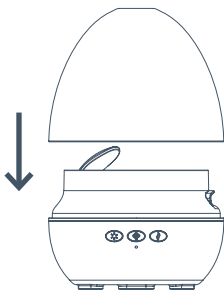

**STEP 2**

Add around 150ml tap water inside the water tank up to the max water level mark. Add 1 to 2 essential oil drops or the oil manufacturer's recommended dosage.

PLEASE DO NOT EXCEED THE MAX WATER LEVEL.
OVERFILLING WATER WILL REDUCE MIST OUTPUT.

Keep essential oils and other chemicals away from the surface of the top cover as they may damage the unit.

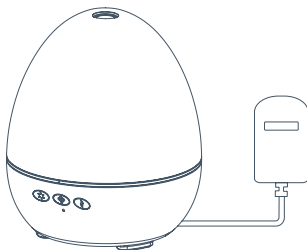

STEP 3

Close the top cover.

STEP 4

Plug into a household power socket using a USB 5V adaptor.

SWITCHING ON/OFF

Short press the ON/OFF button to turn on. To switch the Diffuser off, press and hold the ON/OFF button for 2 seconds. This will turn off the cool mist and the lights.

COOL MIST MODE

The Diffuser starts in continuous mode when turned on. Press the cool mist button to switch to intermittent mode (on 15 seconds, off 15 seconds). The light will flash when changing between mist modes. Press the mist mode button to switch back to continuous cool mist mode.

The Diffuser will turn off automatically when the water tank is empty.

LIGHT BUTTON

Press the light button once to turn on the light revolving colour mode. Press the button again to select the light colour currently displayed. Keep pressing the light button to cycle through the colour and brightness options.

After the colour and brightness options have been cycled through the light turns off. Press again to return to revolving colour mode. Long press for 2 seconds to turn the light off.

The lights revolve through the colour options in the following order: warm-white, green, blue, purple, pink, white and red. Each colour has 2 brightness levels, beginning with the brightest level first switching to the dimmer version second.

For information about vaporisers refer to our website through this QR code

CLEANING

- Regular cleaning will keep your Diffuser running smoother, for longer. We highly recommend emptying the water in the base after each use and disinfecting at least once every 3 days when in use. Do not leave water in the tank when the diffuser is not in use.

- If there is water left in the base of the tank pour this out gently on the opposite side of the base to the air outlet.
- Unplug the diffuser before cleaning and use a soft clean cloth and cotton bud with a solution of water and a capful of white vinegar. The temperature of the water solution should not be higher than 40 degrees. Never immerse the base of the diffuser in water.
- When using essential oils with the diffuser, an oily residue can be left in the base and on the ultrasonic ceramic disc. A mild dish washing detergent and water solution can be used with a soft clean cloth or cotton bud to carefully and gently clean the ultrasonic ceramic disc.
- Allow the diffuser to dry thoroughly after cleaning and before storage in a cool place out of direct sunlight.

TROUBLESHOOTING

Problems	Possible reasons	Solutions
No electricity not working	Power not connected.	Connect the power, press the on/off button.
	Power wire broken or adaptor burn out.	Please contact The Sleep Store
Unable to spray mist or spray output is poor	Is the water level low?	Please fill with water.
	Is there too much water inside the tank?	If the water volume exceeds 150mL (max water line), the mist volume will be very small.
	Is the ceramic disc dirty?	Please clean the water tank.
	Is the top cover correctly placed?	Please place top cover in the correct spot.
	Is the bottom air inlet dirty?	Please clear away the dust in the bottom air inlet.
Main unit is leaking water	Is the top cover correctly placed?	If the top cover is not correctly in place, the water will splash out and fall onto the diffuser or table.
	Condensation water on the unit may be caused by low-temperature or a humid environment.	Please avoid low-temperature and humid environments when using Aroma Diffuser.

CARE & SAFETY INFORMATION

FOR USE IN PREGNANCY OR WITH BABIES/CHILDREN:

- Place the diffuser out of reach of children, babies and pets including the adaptor cord.
- Care should be taken with the use of diffusers and essential oils. Only use safe essential oils for babies, children, during pregnancy or near animals
- See The Sleep Store website for information on the safe number of essential oil drops and diffusion times for babies, children and during pregnancy.

TO PROTECT YOUR DIFFUSER:

- Fill your diffuser with tap water or distilled water. Do not use hot water or mineral water.
- Do not add water above the max level mark. Overfilling will reduce or stop the amount of cool mist produced.
- Only use quality 100% pure essential oils.
- To prevent damage to the plastic and mechanism, do not add more than 5 drops of essential oil.
- Do not cover or block the mist outlet or air inlet.
- Take care when emptying the diffuser, pouring water out the opposite side to the air input.

SAFETY WARNINGS:

The following safety precautions should always be followed, to reduce the risk of electric shock, personal injury or fire.

- Unplug the appliance during filling and cleaning.
- Care should be taken when using the appliance due to the emission of water vapour.
- Use a 5V 1A power adaptor that carries the RCM tick for approved use in New Zealand or Australia.
- Do not place near an electric device such as computer, TV or audio equipment.
- Do not take off the cover during operation of the diffuser.
- Do not use the product if there is an abnormal noise or the diffuser is overheating.
- Do not block the mist outlet or air inlet
